

NH Monthly Indicators

May 2021

As the weather warms and pandemic restrictions ease across much of the country, the U.S. housing market shows little sign of cooling. Robust buyer demand, fueled by low mortgage rates, continues to outpace supply, which remains near historic lows. Nationwide, inventory remains much lower than it was at this time last year, and sales prices are surging as a result.

New Listings decreased 3.2 percent for single family homes and 4.3 percent for townhouse-condo properties. Pending Sales increased 4.4 percent for single family homes and 9.4 percent for townhouse-condo properties. Inventory decreased 54.5 percent for single family homes and 56.0 percent for townhouse-condo properties.

The Median Sales Price was up 25.7 percent to \$402,000 for single family homes and 20.5 percent to \$300,000 for townhouse-condo properties. Days on Market decreased 50.0 percent for single family homes and 46.3 percent for townhouse-condo properties. Months Supply of Inventory decreased 60.9 percent for single family homes and 66.7 percent for townhouse-condo properties.

With such limited supply of existing homes to purchase, all eyes are on home builders to provide a much-needed boost of inventory to the market to help meet buyer demand. However, increasing material and labor costs, along with supply chain challenges, have contributed to significantly higher construction costs, with builders passing these costs on to homebuyers. And while the warmer temperatures, rising sales prices, and the reopening of the economy may draw more sellers to the market, historically low levels of homes for sale are likely to continue for some time.
